
a S
Elemental thermal conductivity, mean abs. deviation (CBFV)
Elemental density, mean abs. deviation (CBFV)
Elemental Gilmor number of valence electrons, mean abs. deviation (CBFV)
Elemental polarizability, mean (CBFV)
Temperature
Elemental metal flag, mean (CBFV)
Elemental 1st ionization potential, mean abs. deviation (CBFV)
Elemental p valence electrons, mean abs. deviation (MAGPIE)
Elemental crystal radius, mean (CBFV)
Elemental unfilled valence electrons (total), mean abs. deviation (MAGPIE)
0
60
SHAP value (μV K−1)
b σ
Elemental MB electronegativity, mean abs. deviation (CBFV)
Elemental melting temperature, mode (MAGPIE)
Temperature
Elemental Pauling electronegativity, mean (CBFV)
Elemental Gilmor number of valence electrons, mean abs. deviation (CBFV)
Elemental 1st ionization potential, mean (CBFV)
Elemental ionic radius, mean abs. deviation (CBFV)
Elemental heat of atomization, mean abs. deviation (CBFV)
Elemental boiling point, mean (CBFV)
Elemental melting point, mode (CBFV)
−0.2
0.0
0.2
SHAP value (log10)
c κ
Elemental heat of vaporization, maximum (CBFV)
Temperature
Elemental boiling point, mean (CBFV)
Elemental Mendeleev number, maximum (MAGPIE)
Elemental unfilled d valence electrons, mean (MAGPIE)
Elemental heat of atomization, mean abs. deviation (CBFV)
Elemental electronegativity, mean abs. deviation (MAGPIE)
Elemental melting point, mean (CBFV)
Elemental heat of vaporization, mean (CBFV)
Elemental periodic-table row, mean (MAGPIE)
0.00
0.15
SHAP value (log10)
d zT
Temperature
Elemental d valence electrons, mean (MAGPIE)
Elemental Zunger radii sum, mean abs. deviation (CBFV)
Elemental DFT ground-state volume per atom, mean (MAGPIE)
Elemental Mendeleev number, maximum (MAGPIE)
Elemental Mendeleev number, mean (MAGPIE)
Elemental covalent radius, mode (CBFV)
Elemental ionic radius, mean (CBFV)
Elemental heat of fusion, range (CBFV)
Elemental polarizability, mean abs. deviation (CBFV)
−0.4
0.0
0.4
SHAP value (zT)
0.0
0.2
0.4
0.6
0.8
1.0
Feature value (percentile rank)
